Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 20-27, 29-43, 51-65 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hsueh et al. USPN 5536264. Hsueh describes an absorbent structure having an absorbent composite (Abstract) having a reinforcing member 42, 70, 80, 9 (Figures 7-12, 26, and 28). The reinforcing member defines generally parallel and non-orthogonal strands (Figures 26 and 28). Hsueh does not disclose the reinforcing member is embedded in the absorbent composite, but comprises a separate layer of the absorbent composite. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the reinforcing member

imbedded in the absorbent composite since forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art. Hsueh discloses multiple reinforcing members (col. 4, lines 10-15). Hsueh further discloses the reinforcing member is stretchable (paragraph 75).
